UNIQUE FEATURES

Compared to other buffalo grass varieties, DNA Certified Sir Walter Buffalo is:

- More shade tolerant
- Soft-leaved
- Rough and tough
- Chemical-resistant

Toughness: 5/5 for toughness

This buffalo grass variety can take a lot of wear and tear, cricket pitches, impromptu football games and daily traffic. It can also handle very low mowing.

Sun and Shade: 5/5 for shade tolerance

DNA Certified Sir Walter Buffalo grass can survive complete light exclusion (underneath kid's pools, etc) for months at a time; it is also green and fresh even in positions that never receive direct sun.

Water Usage: 5/5 stars for water usage

DNA Certified Sir Walter Buffalo is a very water-wise grass variety.

Mowing: Cylinder or rotary

DNA Certified Sir Walter Buffalo will tolerate mowing heights as low as 25mm.

Soil pH: 5.5 – 6.5

Maintenance: 5/5 for maintenance

DNA Certified Sir Walter Buffalo takes its roots down quite quickly and should be fertilized 3 times a year for best year round results.

DNA Certified Sir Walter Soft Leaf Buffalo is a go anywhere and grow anywhere turf that has outperformed other buffalos for the last 15 years. This is why it is Australia's No. 1 Buffalo.

It was bred in Australia for Australian conditions. It can be grown in full sun, shade, extreme heat, frost or drought.

DNA Certified Sir Walter Premium Turf requires less mowing than other turf varieties and it will keep its colour more than other buffalos through the winter.

Gone are the days of walking through a patch of bindii as Sir Walter has a tight growth habit to hold out most weeds. It also repairs itself quickly so this lessens the chance of bare patches through your lawn.

DNA Certified Sir Walter's roots grow deep into the subsoil to where the moisture is and it can cool down the area around your home by up to 10 degrees in the summer.

Should I Use DNA Certified Sir Walter Buffalo?

DNA Certified Sir Walter is an Australian Soft Leaf Buffalo that keeps its colour more through the winter than any other on the market. It is softer to touch, is much harder wearing and most of all looks better with little fuss, which gives you more time to enjoy your lawn and your life.
